Office system bizhub C300

bizhub C300

The integrated office

Stimulating effective workflow

Particularly suitable for the small company or large department the bizhub C300 offers a modern integrated office technology platform to maximise the efficiency of the workgroup. It will provide effective accessible centralisation, sharing of know-how and information in the workgroup with excellent print performance.

- Colleagues will enjoy the intuitive ease-of-access, both over the large touch screen panel and via the web browser. Excellent document creation is available to all. Documents can be combined at will, independent of their format, and are further enhanced by the range of automatic functionality. In fact, the bizhub C300 is so easy to use that everyone effectively becomes an expert.

bizhub c300 

■ The bizhub C300 also achieves full office functionality. The Box functionality supports archiving, the comprehensive scanning facilities, the sharing of job settings, the printing capability and paper handling is also just what is needed for the modern effective office. It includes high definition monochrome and high quality colour printing combined with mixmedia, special print media and the embedded finishing.

■ Savings abound. In comparison with multiple stand-alones the bizhub C300 is an investment with very good returns and could bring running costs down significantly. The ease of operation, the extensive office functionality and the flexible excellent printing and finishing release an enormous amount of staff time for their true high-level roles.

The bizhub C300 integrated office is the economic key to synergy, quality and success.

Play it easy! Be effective!

The common bizhub family platform is amazingly straightforward to use and, of course, immediately transferable to other devices in the bizhub range – a notable benefit when upgrading or extending the bizhub capacity.

- The large touch screen panel features an intuitive, user-friendly programming approach and the PageScope Web Connection facilitates the complete range of monitoring and set-up functions via the web browser
- The bizhub C300 incorporates a welcome range of automatic functionality including:
 - auto colour recognition – only colour pages are printed in the colour mode
 - auto paper selection – to suite the copy or print size
 - auto tray switch – in the event of any empty tray
 - auto zooming – maximises the print size to suite the page sizethereby further supporting the ease of use and improving the efficiency of the printing.
- Job programmes for copying, printing and scanning can be saved and recalled at the touch of a button, for example for the immediate repeat of a job. The sharing of job settings makes life very easy and straightforward e.g. a scan to eMail programme for newsletters can use the already created settings for the document and the addressees. Once again the easy functioning of the integrated office is impressive.
- The PageScope Workware gives all users an easy overview and administration of their documents and possess the power to combine documents whatever their format e.g. complicated reports with graphics, tables and text are child's play.
- Maintenance is no sooner said than done. The user simply opens the front panel and exchanges the cartridges as required.

Wheel away the old!

Achieve office functionality

Without office integration an array of rudimentary devices are necessary to perform the various tasks and the operation is both limited and costly. With the bizhub C300 office functionality the handling of communication through various document types, varied distribution patterns and print production becomes flexible. In addition productivity levels increase considerably.

- The bizhub C300 offers integrated internal and external digital management and communication including comprehensive scanning flexibility and analogue/digital transmission by fax. The Box functionality is the pivot for this all-round capability and accessibility to each of the up to 1,000 boxes can be defined.

As the Boxes can store copy, print, scan and fax files, comparable to being on a network drive, users enjoy ideal control, for instance, sharing and archiving documents and reprinting and sending files. That is ideal functionality.

- Scanning takes on a new dimension with the bizhub C300. Supported by the address book, which can store up to 2,100 addresses, scanning to customer eMail, FTP, Box or a personal PC is easy. Formats PDF, JPG and TIFF are available, as well as the special bonus of compact PDF. The speed of up to 65 originals a minute and the automatic document feeder, which enables double-sided scanning are certainly welcome. In comparison, the rudimentary desktop scanner has little to offer. Yet again the advantages of office functionality become obvious.

- The bizhub C300's combination of high resolution monochrome and high quality colour copying and printing is a must for the modern office and, in addition, there is a whole range of finishing possibilities: Mixmedia is available at page level within any job. Colour pages can be inserted as required e.g. for impressive handouts. What was previously impossible or only achievable with many manual operations or with distracting out-sourcing is accessible to all with the bizhub C300 integrated office functionality.

Better Productivity and further savings

Improvements in productivity and reductions in costs are always goals and it is even more desirable when they go hand in hand. The investment in new office technology can improve workflows and achieve both. The bizhub C300 represents a very good return on investment and the reasons are compelling.

- The bizhub C300 is the complete office package yielding investment dividends. In comparison with multiple rudimentary, stand-alone workplaces it gives considerable space-saving and unmatched quality and flexibility. The bizhub C300 brings running costs down and makes budgetary sense.
- Cost savings also come from the considerable amount of time which staff save. Through the digital Box functionality, which facilitates the

ideal workflow situation, the scanning facility is fast and effortless and job settings can be shared, both saving much time.

- Ease-of-use and easy document creation also make their contribution. The finishing, from stapling to booklet production, eliminates substantial manual work and also out-sourcing, both of which were previously unnecessary consumers of staff time. Staff are freed to concentrate on their essential roles.

The bizhub C300 promotes increased productivity and generates all-round cost savings both directly and with the saving of staff time.

→ Compact PDF

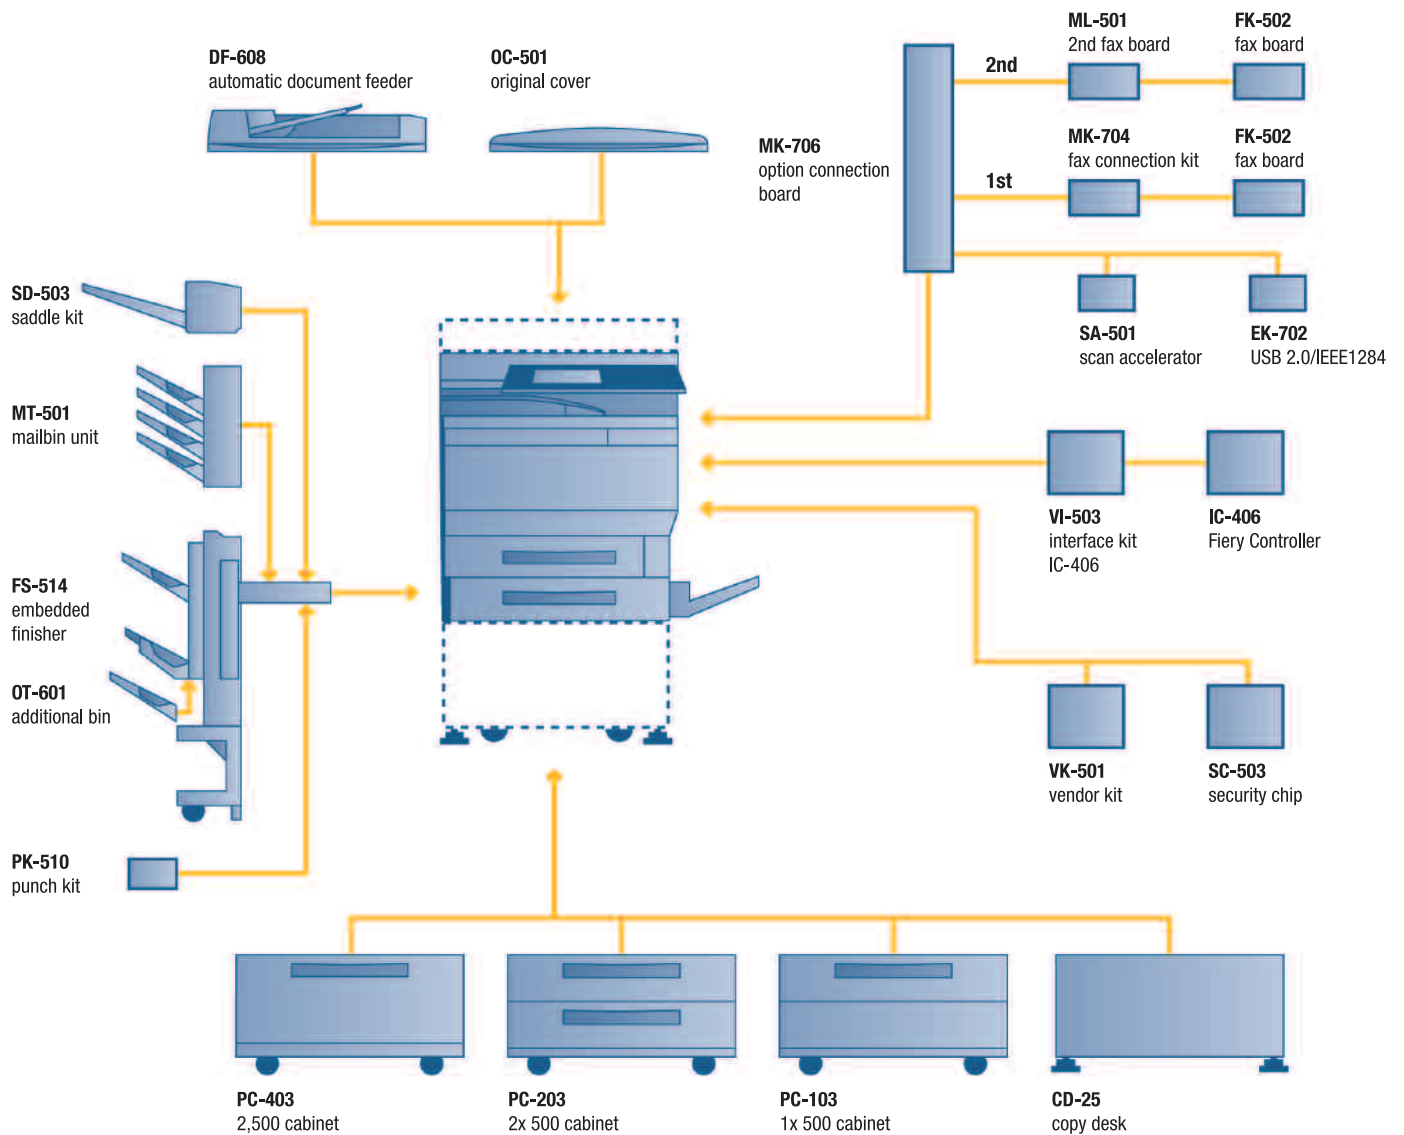

The compact format reduces the data size of documents. This saves much time, particularly when sending large files to external addresses.

→ Encrypted PDF

This security function has various options available including the recipient being prevented from opening the document.
